

Design File

Title and Authors

- The name of this phase which you coded for. e.g.: phase 1, phase 2...
- Names of the group members.

Purpose of The Phase

Code Explanation

- Well comment your code.
- Well organize the code in blocks.
 - A block can be one of natural blocks. e.g.: a function or a class
 - Or a group of lines that has the same type. e.g.: variable declaration
 - Or a group of lines that collaborate to perform a single function.
- Snapshot each code block.
- Explain each block of your code under each associated snapshot.

Execution Example

- Snapshot each key frame of your code execution.
- Post 3-5 snapshots in your design file.
- 2 of the snapshots should be the commandlines to start execution and the result.
